

SPC FLOORING

WHAT IS G FLOOR SPC ?

Stone Plastic Composite (SPC) is an engineered luxury vinyl that combines limestone and stabilizers to create an extremely durable core. The high density core offers better resistance from scratches and dents making it more durable. It doesn't require the use of an adhesive and is easily installed with the click locking system, helping to reduce installation time and costs.

INTERLOCK SYSTEM

G floor SPC uses a special interlocking system. Our floors have a 'click locking' system where it fits two panels together effortlessly using a tongue and groove model. This enables the finished floor to look very neat and seamless

MAINTENANCE

SPC flooring is not only cheaper than solid floor, but also it is much easier to clean and maintain. Use vacuum or broom to remove dirt and debris. You can also use a damp mop on the surface as this is a totally waterproof floor.

SPC - PRODUCT BENEFITS

-  Easy Installation
-  Anti Bacterial
-  Anti Slipping
-  Damp Proof
-  Wear Resistant
-  High Strength
-  Durable
-  Sound Absorbing
